SUMMARY

21-year-old motivated trainee/junior full-stack developer with a Bachelor's degree in Software Engineering. Strong foundation in programming concepts, OOP, SOLID and modern software design principles. Hands-on experience building applications with ASP.NET Core using layered, clean architecture, covering authentication, ORM, multiple SQL/NoSQL databases, caching, concurrency handling, and Docker-based containerization. Most confident in C# and JavaScript/TypeScript, with additional experience in Python for basic data analysis and web scraping. Quick learner, eager to grow as a professional software developer, passionate about creating scalable and maintainable systems, exploring how technologies work under the hood, and applying best practices to optimize real-world applications.
